Coal Ash Management

Slater Infrastructure Group provides engineering, program management, and construction management services specializing in infrastructure.

We have a proven record of successfully meeting the growing demands of resilient infrastructure and have worked alongside major multi-national and public sector entities in the water/wastewater, utility, transportation, and environmental sectors for almost 25 years.

In our effort to meet our clients' challenges, we have initiatives that tackle the pressing environmental issue of coal ash management.

According to EPA, coal ash, also referred to as coal combustion residuals or CCRs, is produced primarily from the burning of coal in coal-fired power plants.

Coal ash is disposed of or used in different ways depending on:

- the type of by-product,
- the processes at the plant and
- the regulations the power plant has to follow.

How much coal ash is there?

Coal ash is the second largest stream of industrial waste in the US at approximately 130 million tons produced per year.

Why does the EPA regulate coal ash?

According to the EPA, coal ash contains contaminants like mercury, cadmium and arsenic. Without proper management, these contaminants can pollute waterways, ground water, drinking water, and the air.

Slater Infrastructure Group's extensive industry experience allows us to implement acquired capabilities and skillsets while upholding the highest ethical, safety, and completion standards.

Our team further reviews construction erosion control plans, sedimentation and sampling inspections and reports to determine compliance with required project compliance guidelines, permit and land disturbance requirements. Our services include:

- Compliance Strategy
- Wastewater Treatment
- Project Management
- Beneficial Use and Inspections
- Due Diligence/Cost Estimating
- Regulatory and Compliance Support
- Structural Assessments
- Wastewater Evaluation
- Risk Assessments
- Engineering Design
- Construction Management
- Coal Ash Remediation
- Strategic Planning and Consultation

Featured Capabilities

Slater Infrastructure Group has worked with public and private entities including major multinational firms. With our extensive industry knowledge, we can introduce and implement infrastructure services for the following verticals:

TRANSPORTATION PROGRAM & CONSTRUCTION SERVICES

- GDOT construction management prequalification
- Construction management oversight and inspection services
- Construction procurement
- Facilities management
- Project start-up and scheduling
- Quality assurance and control

ENVIRONMENTAL SERVICES

- Environment due diligence
- Remediation solutions and services
- EHS site services
- Materials testing and inspection
- Regulatory compliance solutions

Other Services

- Facilities Management
- Operations & Maintenance Services

WATER & WASTEWATER SERVICES

- Water/Wastewater operations and maintenance
- Water/Wastewater systems inspection
- Stormwater management
- Water/Wastewater certification and training
- Infrastructure assessment
- Satellite leak detection
- Microbial sensor technology
- Workforce development and training

- Erosion control
- Phase I and II environmental site assessments
- EHS compliance audits
- Strategic environmental planning
- Inspection services

- Employee Development & Training
- Engineering Services

Contract Partners

- Jacobs
- General Motors
- United Parcel Service
- City of Jackson, MS
- Georgia Power
- Georgia Natural Gas
- MARTA
- Atlanta Gas Light
- Veolia North America
- Hartsfield-Jackson Atlanta International Airport
- Kroger
- Home Depot
- Verizon
- Hazen and Sawyer
- Garney
- Exelon
- Department of Defense

Core Competencies

Formed in 1997, Slater Infrastructure Group LLC (previously Multi-Energy Group) is a leading infrastructure services firm. The company provides engineering, program management, and construction management services specializing in infrastructure within a broad range of industries to build a better future for all.

Key Differentiators

We have a proven record of successfully meeting the growing demands of resilient infrastructure and have worked alongside major multi-national and public sector entities in the water, wastewater, utility, transportation, and energy sectors.

- Woman and Minority owned business ("WMBE")
- Training and Certified Workforce Development
- Disadvantaged Business Enterprise ("DBE")
- 25+ Year Proven Track Record

List of Certificates

- GMSDC – MBE
- GDOT – DBE
- GDOT- Construction Supervision Prequalification
- City of Atlanta – AABE, FBE, SBE
- City of Charleston, SC - MFBE
- City of Jackson – AA/FBE
- Fulton County, GA – MFBE
- DeKalb County, GA – LSBE
- Clayton County Water Authority - SLBEA
- North Carolina – HUB
- SAMs
- FEMA

Company Data

- NAICS: 237310, 561210, 541618
